Join I²SL in Making the World's High-Tech Facilities Sustainable

The International Institute for Sustainable Laboratories (I²SL) is a 501(c)(3) nonprofit organization dedicated to the sustainable design, engineering, and operation of laboratories and other high-technology facilities. As host of the I²SL Annual Conference, I²SL is the world's premier resource for high-tech facility professionals—from education and tool development to networking and partnering—with the aim of making the world's high-tech facilities sustainable. I²SL also offers in-person workshops and online webinars and develops resources in relevant technical areas such as laboratory benchmarking.

For more than a decade, I²SL has been the source for individuals and organizations looking to learn more about and become engaged with laboratory sustainability. I²SL works to support information sharing and education opportunities among the high-tech facility community. I²SL hopes you will join the organization as a member to help continue this important work.

I²SL looks to its Members to develop resources, including benchmarking data, operations and maintenance training, and a laboratory user manual, all of which help guide the high-tech facility community toward creating more sustainable facilities. Become an I²SL Member to be on the front lines of these and other initiatives and take advantage of all that an I²SL membership has to offer.

Member Benefits*

- Registration discount at the I²SL Annual Conference.
- Free access to all of I²SL's High-Tech Talk Webinars.

JOIN TODAY

Individual membership dues are \$185 per year. Full-time students are \$25 per year. Group memberships for academic, government, and nonprofit institutions are available for \$600 per year. Become an I²SL Member today:
