I²SL WINDY CITY CHAPTER EVENT

SUSTAINABILITY CONSIDERATIONS FOR SPECIALTY LABORATORY DESIGN

University of Illinois-Chicago, Student Center East, White Oak Room (750 S. Halsted)
Thursday, Sept. 21, 2017, 5:00 to 8:30 p.m.

As notorious energy consumers, laboratory mechanical and electrical systems are typically the focus of sustainability initiatives in laboratories. However, many additional architectural opportunities exist to infuse sustainability into a well-designed lab. Join the Windy City Chapter for an exploration of strategies and a discussion of how they can be integrated into a variety of specialty lab types (academic, research, crime, biosafety, clinical, simulation, and others). Topics will range from “lean” planning to finish selection and everything in between. Speakers: Carlos Perez-Rubio, AIA, LEED AP, and Amy Tongay, AIA, both Lab Architects at Health Education & Research Associates Inc.

5:00 to 6:00 pm: Registration, networking, and refreshments

6:00 to 8:00 pm: Presentation

8:00 to 8:30 pm: Q&A and Wrap-Up

I²SL Members and Lab Owners/Users: \$15

Non-Members and Non-Owner/Users: \$30

Save by joining I²SL National (\$185)! www.i2sl.org/globalcommunity/becomemember.html

I²SL WINDY CITY CHICAGO CHAPTER

I²SL Windy City Chapter specializes in training and education, research through international and industry collaboration, and technical assistance to help improve the energy and environmental sustainability of laboratories and related high-technology facilities. i2sl.org/globalcommunity/chapters/windycity.html
