

GEORGIA CHAPTER NEWSLETTER

FALL 2024

Credit: Garey Gomez Photography, Perkins&Will

Hello I2SL Georgia Chapter!

We hope you will join us for a building tour and our Fall Social at the newly developed Science Square Labs at Georgia Tech. The event will include a building tour and social hour, so come out and enjoy the space and views with light snacks, drinks, and discussion!

Science Square Labs is a speculative 364,740-square-foot Class A lab/office tower completed in 2024. This 13-story tower offers up to 35,558-square-foot floor plates designed for state-of-the-art lab build out, providing the opportunity for life sciences innovators to tap into Atlanta's diverse talent base. Join us for a tour of this building and learn more about the individual spaces and all this building has to offer, creating a uniquely collaborative atmosphere.

We are looking forward to expanding our current board structure and welcoming new members to participate in our great chapter. Please come and bring a friend!

Events
