Join I²SL in Making the World's High-Tech Facilities Sustainable

The International Institute for Sustainable Laboratories (I²SL) is a 501(c)(3) nonprofit organization dedicated to the sustainable design, engineering, and operation of laboratories and other high-technology facilities. As co-sponsor of the Laboratories for the 21st Century (Labs21®) conference and workshops from 2006 to 2012 and now host of the I²SL Annual Conference, I²SL is the world's premier resource for high-tech facility professionals—from education and resource development to networking and partnering—with the aim of making the world's high-tech facilities sustainable. Building and expanding on Labs21, I²SL has hosted the Labs21 Annual Conference, offered in-person workshops and online webinars, and developed resources in relevant technical areas such as sub-metering and building information modeling.

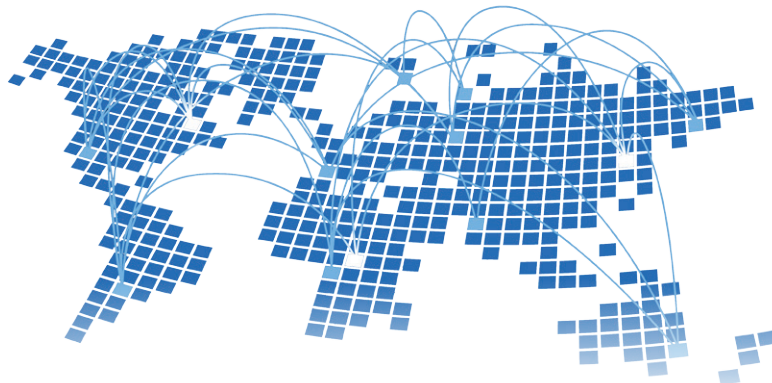

For more than a decade, the Labs21 program has been the source for individuals and organizations looking to learn more about and become engaged with laboratory sustainability. I²SL now assumes responsibility to continue the mission of Labs21 and will take the reins to ensure the information sharing and education

Individual membership dues are \$185 per year. Dues for full-time students are \$25 per year. Become a member today by signing up online at <http://i2sl.org/globalcommunity/becomemember.html>.

continue among the high-tech facility community. I²SL hopes you will join the organization as a member to help continue this important work.

I²SL will look to its Members to develop resources, including metering guidelines, high-tech facility operations and maintenance certification, and a laboratory performance rating system, all of which will guide the high-tech facility community toward creating more sustainable facilities. Become an I²SL Member to be on the front lines of these and other initiatives and take advantage of all that an I²SL membership has to offer.
