

# I<sup>2</sup>SL Chapter Resources

## School's Out, But Chapter Events Are in Session!

Dear I<sup>2</sup>SL Chapter Officers,

As school lets out for the summer, class is still in session for chapter events! Providing educational opportunities can boost your chapter's income and expand your network of high-technology facility architects, engineers, owners, managers, and designers. I<sup>2</sup>SL has a variety of workshops that chapters can showcase at local events to keep your network engaged throughout the year. Workshop topics include:

- [Sustainable Strategies for Laboratory Planning, Design, and Operation](#)
- [Evaluate the Savings and Return on Investment \(ROI\) of Laboratory Energy Savings Strategies](#)
- [Building a Green Lab Engagement Program](#)
- [Laboratory Ventilation for Professionals and Fume Hood Testing Certification](#)
- [Energy-Efficient Laboratory Ventilation Design Practices and Technologies](#)

### Chapter Spotlight

Need inspiration on workshops and seminars to offer at your local chapter? Check out the past events from the [Emerald City Chapter](#) and the [Windy City Chapter](#)!

Chapters can host an I<sup>2</sup>SL workshop at no additional cost aside from any expenses associated with providing an on-site instructor. In addition, chapters can contact [I<sup>2</sup>SL distinguished speakers](#) or explore the [High-Tech Talks webinar archive](#) for more ideas on workshop topics and presentations to offer at your next chapter event.

Thank you for your continued support of I<sup>2</sup>SL!

Crystal Jones and Erin Pittorino  
I<sup>2</sup>SL Chapter Coordinators
