

## I2SL Landfill Diversion Working Group DRAFT

### Vision:

To relieve the burden of material waste from laboratories.

### Mission:

To create avenues for landfill diversion of laboratory material waste through communication with suppliers and purchasers of laboratory products.

### Objectives:

TBD

### Strategies:

Fact finding to determine how our group can add value

Advise to specific suppliers already established in sustainable laboratory product/packaging design

Develop guidance communication directed to suppliers of laboratory supplies such that purchaser needs for landfill diversion are considered in product and packaging design

Develop guidelines on clinical and research lab purchasing directed to purchasers to decrease material waste coming into the lab
